

Supermart Grocery Sales Dashboard

Project Context

Ram is working on a Supermart Grocery Sales Dashboard using the company's sales data. The management team wants a simple dashboard that helps them understand sales, profit, products, discounts, and geographic performance in one place.

Ram needs to analyze the available sales data and convert the findings into an easy-to-understand interactive dashboard. The dashboard should help management answer important business questions without going through the complete dataset.

02 / OBJECTIVE 1

Understand Overall Sales Performance

Use the business question and tasks below to guide the dashboard analysis.

Business Question

How is the overall grocery business performing?

Tasks

- 1. What are the total sales and total profit?
- 2. Which product categories contribute the largest share of total sales?
- 3. How do sales change over time?
- 4. Which regions generate the highest sales?

Supermart Grocery Sales Dashboard • SapphireIQ Student Project

02 / OBJECTIVE 2

Understand Product Performance

Use the business question and tasks below to guide the dashboard analysis.

Business Question

Which products and categories are driving sales and profit?

Tasks

- 1. Which categories and sub-categories generate the highest sales?
- 2. Which products have high sales but comparatively low profit?

02 / OBJECTIVE 3

Understand Profit and Discount

Use the business question and tasks below to guide the dashboard analysis.

Business Question

How are discounts and profit related to business performance?

Tasks

- 1. Which categories and regions generate the highest profit?
- 2. Is there a relationship between discount and profit?

02 / OBJECTIVE 4

Understand Geographic Performance

Use the business question and tasks below to guide the dashboard analysis.

Business Question

Which locations are contributing most to the business?

Tasks

- 1. Which states and cities generate the highest sales?
- 2. Which locations have high sales but comparatively low profit?
